WORK NOTICE

ADDITIONAL FIELDWORK ACTIVITIES

Former Western Lead and Metal Site 2182 E. 11th Street, Los Angeles, California

Additional fieldwork activities are scheduled to be conducted at the Former Western Lead and Metal Site from Monday, May 8, 2006 through May 12, 2006. The work will be conducted from approximately 7 a.m. until 5 p.m. daily.

Fieldwork activities will consist of excavating selected soils from the unpaved areas along Wilson Street between 14th Street and Olympic Boulevard. The soil removal may be up to three feet deep, and is expected to be removed in eight truckloads. A licensed contractor, working on behalf of Environmental Strategies Consulting LLC, will perform the fieldwork under the oversight of the Department of Toxic Substances Control (DTSC), a state regulatory agency.

The fieldwork will include the removal of soil so you may see workers and heavy machinery in or around your neighborhood. Efforts will be taken to minimize noise and disruptions to traffic. No street closures are currently planned. The work is scheduled for approximately five days.

The site's Supplemental Excavation Workplan is available for viewing at the following locations:

City of Los Angeles Public Library
Little Tokyo Branch
244 S. Alameda Street
Los Angeles, CA 90012
